NEW QUESTION: 2

Based on the need to limit processing and bandwidth utilization due to dynamic routing protocol operation, the following routing requirements have been specified for your network.

-Partial and incremental routing updates

-Only the devices affected by a topology change perform route recomputation

-Route recomputation only occurs for routes that were affected Which dynamic routing protocol should be deployed in your network to best meet these requirements?

- A.** BGP
- B.** RIPv2
- C.** IS-IS

D. EIGRP

E. OSPF

Answer: D

Explanation:

The bandwidth utilization issue has been addressed by implementing partial and incremental updates. Therefore, only when a topology change occurs does routing information get sent. Regarding processor utilization, the feasible successor technology greatly reduces the total processor utilization of an AS by requiring only the routers that were affected by a topology change to perform the route recomputation. Furthermore, the route recomputation only occurs for routes that were affected. Only those data structures are accessed and used. This greatly reduces search time in complex data structures.

NEW QUESTION: 3

You are running multiple policy modeling projects and are using the collaboration and inclusions functionality

to ensure consistent screen wording and reuse. You have a "corporate reference" project that contains some

standard interview screens used in all Policy Modeling projects for your company.

Your company has had some policy changes and you are required to change the wording and layout on the

common screens for all Policy Modeling projects. The changes are required immediately.

How can you achieve this using the minimum number of steps?

A. Update the corporate reference project and upload the new version to the Hub. Remove and then add the

inclusions for all of the other projects, because inclusions will not merge screens.

B. Update the corporate reference project in Policy Modeling, then upload the new version to the Hub.

Deploy the new version of the corporate reference project and the changes will then be automatically

propagated to all other Policy Modeling projects.

C. Update the corporate reference project and upload the new version to the Hub. Update all of the other

projects individually by clicking the Reset button on the Inclusions tab.

D. Copy the screens from the Corporate project into all of the other Policy Modeling projects individually,

and then click the Add button on the Inclusions tab for each project.

E. Update the corporate reference project and upload the new version to the Hub. Update all of the other

projects individually by clicking the Update button on the Inclusions tab.

Answer: A
